

Thornfield Bookkeeping Ltd — Implementation Status

Keyed to exact option_code per control Prepared: 2026-10-02

Internal review only — not the distributable policy. This record shows the organisation's current implementation status against each control, keyed to the exact option selected. It is shown in the product's own Policy review screen, not included in the downloadable policy PDF.

Implementation status

Multi-factor authentication (staff) Met (MFA_USER_ALL_REQUIRED)

MFA is required for all staff accounts.

None — already met.

Multi-factor authentication (admin) Met (MFA_ADMIN_ALL_REQUIRED)

MFA is required for all administrator accounts.

None — already met.

Endpoint protection Met (ENDPOINT_PROTECTION_ALL)

All work devices have endpoint protection.

None — already met.

Patching Met (PATCHING_AUTOMATIC)

Automatic updates enabled and checked regularly.

None — already met.

Device encryption Met (DEVICE_ENCRYPTION_ALL)

Full-disk encryption enabled on all relevant devices.

None — already met.

Backups Gap (BACKUPS_RESTORE_UNTESTED)

Backups exist but a restore has never been tested.

Schedule and carry out a test restore.

Access removal (joiner/mover/leaver) Met (JML_DEFINED_FOLLOWED)

A defined access-removal process is followed consistently.

None — already met.

Privileged access separation Met (PRIV_SEP_DEDICATED)

Dedicated admin accounts are used, separate from everyday accounts.

None — already met.

Staff security awareness Gap (AWARENESS_OCCASIONAL)

Awareness activity is informal and occasional.

Introduce a regular, structured awareness programme.

Incident reporting route Gap (INCIDENT_ROUTE_NONE)

No clear route for staff to report suspected incidents.
Establish and communicate a clear incident reporting route.
