

Harlow Digital Consulting Ltd — Information Security Policy

Version: Draft 1 Generation: Deterministic (normative template) Prepared: 2026-10-02

1. Purpose and scope

This Information Security Policy sets out Harlow Digital Consulting Ltd's commitments for protecting the information and systems it uses, and applies to all staff, contractors and systems used to carry out the organisation's work. **Commitment**

2. Responsibilities and governance

Senior leadership, represented by Priya Shah, Managing Director, maintains overall accountability for information security. **Commitment**

The Security responsible person, Tom Ridley, is accountable for day-to-day information security matters, including coordinating this policy's implementation. **Commitment**

All staff are responsible for following this policy and reporting concerns promptly. **Commitment**

3. Access and authentication

Multi-factor authentication must be used for all staff and administrator accounts. **Commitment**

Administrator/privileged access must be kept separate from everyday user accounts. **Commitment**

4. Devices, protection and updates

Work devices must run appropriate endpoint protection, receive security updates promptly, and use full-disk encryption where applicable. **Commitment**

5. Information handling and backup

Important business data must be backed up, and the ability to restore from backup must be periodically tested. **Commitment**

6. Workplace and remote working

Any remote or offsite access to business systems, where it exists, must be governed and controlled. **Commitment**

7. Security incidents and reporting

Staff must have a clear, known route to report suspected security incidents to Tom Ridley. **Commitment**

Staff must receive regular security-awareness activity appropriate to their role. **Commitment**

8. Review, approval and document control

This policy is reviewed at least annually, or sooner if the organisation's circumstances change materially, and is approved by Priya Shah before distribution. **Commitment**

Approving this policy records the organisation's security commitments. It does not certify that every control is currently in place — see the organisation's own Implementation status record for the current picture.

Commitment

M008 design artefact (Revision 2) — synthetic example only. Not a real customer document.
