

Harlow Digital Consulting Ltd — Implementation Status

Keyed to exact option_code per control Prepared: 2026-10-02

Internal review only — not the distributable policy. This record shows the organisation's current implementation status against each control, keyed to the exact option selected. It is shown in the product's own Policy review screen, not included in the downloadable policy PDF.

Implementation status

Multi-factor authentication (staff) Gap (MFA_USER_SOME_REQUIRED)

MFA is required for some staff accounts, not all.

Extend MFA enforcement to every staff account.

Multi-factor authentication (admin) Met (MFA_ADMIN_ALL_REQUIRED)

MFA is required for all administrator accounts.

None — already met.

Endpoint protection Gap (ENDPOINT_PROTECTION_COMPANY_ONLY)

Company devices are protected; personal/BYOD devices are not.

Extend endpoint protection to personally owned devices used for work.

Patching Gap (PATCHING_IRREGULAR)

Updates happen irregularly, with no consistent cadence.

Establish a routine patching cadence.

Device encryption Gap (DEVICE_ENCRYPTION_SOME)

Full-disk encryption is enabled on some, not all, relevant devices.

Extend encryption to the remaining devices.

Backups Gap (BACKUPS_RESTORE_UNTESTED)

Backups exist but a restore has never been tested.

Schedule and carry out a test restore.

Access removal (joiner/mover/leaver) Gap (JML_INCONSISTENT)

Access removal happens inconsistently.

Define and follow a consistent access-removal checklist.

Privileged access separation Met (PRIV_SEP_DEDICATED)

Dedicated admin accounts are used, separate from everyday accounts.

None — already met.

Staff security awareness Gap (AWARENESS_NONE)

No security-awareness activity is currently provided.

Introduce a security-awareness programme for staff.

Incident reporting route Gap (INCIDENT_ROUTE_INFORMAL)

A reporting route exists informally but is not consistently known.

Make the incident reporting route clear and well-known to all staff.

Email/phishing protection Met (PHISHING_PROTECTION_ACTIVE_ALL)

Active anti-phishing protection enabled on all business email.

None — already met.

Remote access control Gap (REMOTE_ACCESS_SOME_UNMANAGED)

Some remote-access paths are not currently managed or governed.

Bring all remote access under a governed method (e.g. VPN or conditional access).

M008 design artefact (Revision 2) — synthetic example only. Not a real customer document.
